* Bidyadanga is a cultural student exchange programme - Kids Together—Sharing Cultures -Sharing Schools

VOLUNTARY CONTRIBUTIONS & CHARGES 2018

Striving for Excellence

SWANBOURNE PRIMARY SCHOOL

HELPING YOUR CHILD TO LEARN

BEFORE SCHOOL

Learning begins at home. As a parent you play a key role in supporting your child's learning, particularly in reading, writing and maths. We know from research that the first five years of your child's life are the most important as the brain develops. When you do everyday activities like cleaning the house, doing the shopping and playing games with your child, you are helping them to learn. These experiences will prepare them for starting school.

RAISING A CONFIDENT READER

Watching your child become a confident reader and sharing the journey with them is a wonderful experience. A large part of our everyday life depends on reading. Helping your child to read will open their minds to a whole range of topics. There are many ways you can help your child build their confidence and develop strong reading skills every day. One of the easiest and most valuable things you can do at home is to read to your child and show them how much fun you can have when you read.

MATHS IS MORE THAN NUMBERS

It also involves shapes, direction, position and measuring. You can help your child build their confidence and develop strong maths skills by including fun and easy activities into your child's daily routine. Support from you at home can often make the difference between your child enjoying or being scared of maths at school. Remember – your child is counting on you and the little 'lessons' will really add up!

SPELLING

Knowing your A, B, C's. Children learn about words through experiences such as reading books and seeing words in and around your home and community. As a parent, you play an important role in shaping how your child feels about spelling. You can help your child gain confidence and skills with letters, words and spelling by playing fun games at home.

WRITING

Writing for success. Writing is one of the building blocks for a successful education and a wonderful way for children to express themselves. As a parent there are many things you can do through your child's play and everyday fun activities that will help your child learn about words and writing.

SCIENCE

Science is part of our lives and learning about science helps us understand our amazing world. We depend on science in lots of ways every day, so it's important for children to learn about it. Science helps your child understand how our wonderful world works. Science discoveries are fun as well as educational.

Striving for Excellence

LEADERSHIP PROGRAMS

The Our Junior Leadership program is developed through our outdoor education activities. We have distinct programs for the year three, four, five and six students.

Year 3

Sleepover - School Oval

Year 4

Sleepover - Perth Zoo

Year 5

Canoeing and Water Safety program at the Marine Education Centre in Fremantle. A three day camp is held in Rottnest.

Year 6

Canoeing and Water Safety program at the Marine Education Centre in Fremantle. A seven day camp in Dampier follows this program.
